Damilare Akinwale

Backend Software Engineer

Lagos, Nigeria | capstone.candidate011@example.com | +234 800 000 0011

PROFESSIONAL SUMMARY

Experienced backend software engineer with 9 years of experience in education environments. Works across Python, FastAPI and PostgreSQL, with emphasis on API design, reliable data workflows and maintainable service integrations. Has contributed to production services, release quality and technical documentation across cross-functional teams.

CORE COMPETENCIES

Python | FastAPI | PostgreSQL | Docker | Git | Pytest | Redis | CI/CD | AWS

PROFESSIONAL EXPERIENCE

Backend Software Engineer | Harbor Peak Analytics

2023 - Present | Lagos, Nigeria

- Designed database access patterns for enrolment operations; documented expected payloads and failure scenarios for integration partners.
- Contributed to deployment pipelines and environment configuration, reducing manual steps during controlled releases.
- Added role-based API guards and request logging for sensitive account actions in the education platform.
- Measured a 22% improvement in an internal enrolment operations response-time benchmark after revising data access and request handling.

Software Developer | Horizonline Analytics

2017 - 2023 | Nigeria

- Developed and maintained Python-based services for enrolment operations, including API request validation and clear error responses.
- Optimized database queries for frequently accessed records, reducing median retrieval time by 28% during an internal performance test.
- Introduced repeatable regression checks for enrolment operations and improved release handovers with reproducible test evidence.

SELECTED PROJECTS

Transport Route Planner | 2026

- Implemented a Python service layer for aggregating delivery windows and route-assignment updates; documented payload validation, test cases and error-handling behaviour.
- Prepared integration documentation for 10 endpoints and resolved edge-case failures discovered in peer testing.

Equipment Support Desk | 2025

- Implemented a Python service layer for triaging device incidents and recorded resolution steps; documented payload validation, test cases and error-handling behaviour.

EDUCATION

BSc Information Technology | Babcock University | 2016

PROFESSIONAL CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900)
